

## Alexandria Blacker

Program Director - Community Partnership, Medicine

 Curriculum Vitae available Online

### Bio

---

#### BIO

Alexandria Blacker, PhD, MPH is the Director of the Stanford Department of Medicine's Community Partnership Program and adjunct faculty in the Milken School of Public Health at George Washington University. As a public health professional, Dr. Blacker has worked in breast cancer behavioral research, primary care redesign, community health, health care worker well-being, and program implementation.

In her current role, she focuses on building bi-directional, equitable, and sustainable partnerships to advance local health equity. Dr. Blacker's research focuses on understanding processes to developing sustainable community-academic partnerships and exploring the complexity of interprofessional health care teams including teaming behaviors and contextual influences.

Dr. Blacker has had the pleasure of working with Stanford in both the health care and University settings. As a Stanford Health Care employee, Dr. Blacker worked for the Stanford Coordinated Care clinic and managed the disease management program for employees and staff. She also worked closely with her colleagues to assist in the change management efforts for the Primary Care 2.0 redesign implementation by developing educational curriculum and go-live execution with physicians, clinic managers, and team members.

As a University employee, Dr. Blacker previously worked as part of the HealthySteps to Wellness team as the Wellness Manager for Stanford Health Care. In this role, she worked cross-functionally with department heads to design and manage wellness-based trainings. She has developed curricula in positive psychology, stress management, and behavior change. She has conducted over 100 trainings and conducted programmatic evaluations to streamline processes to increase overall effectiveness.
