#### BIO

Aaron Roodman is a professor of Particle Physics & Astrophysics at the SLAC National Accelerator Laboratory, specializing in observational cosmology. Trained in experimental particle physics, he spent two decades studying differences between Matter and antiMatter, before turning his research to astrophysics and cosmology. Roodman's current research focuses on the study of Dark Energy using images from the Vera C. Rubin Observatory. He has played a major role in the construction of the LSST Camera, the world's largest digital camera, and is currently the leader of the LSST Camera program and Deputy Director of the Rubin Observatory for construction.
