Bio

BIO

Ian H. Gotlib is the Marjorie Mhoon Fair Professor and Director of the Stanford Neurodevelopment, Affect, and Psychopathology (SNAP) Laboratory at Stanford University. From 2005-2010, Dr. Gotlib served as Senior Associate Dean for the Social Sciences, and he served as Chair of the Psychology Department at Stanford from 2012-2018.

In his research, Dr. Gotlib examines psychobiological factors that place individuals at increased risk for developing depression and engaging in suicidal behaviors, as well as processes that are protective in this context. More specifically, Dr. Gotlib examines neural, cognitive, social, endocrinological, and genetic factors in depressed individuals and applies findings from these investigations to the study of predictors of depression in children at risk for this disorder. In related projects, Dr. Gotlib is also examining the differential effects of early life stress on the trajectories of neurodevelopment in boys and girls through puberty in an effort to explain the increased prevalence of depression and suicidal behaviors in girls in adolescence. Finally, Dr. Gotlib is extending this work to the study of brain function and structure, endocrine function, and behaviors in neonates and infants being raised in suboptimal environments.

Dr. Gotlib's research is supported largely by grants from the National Institutes of Health. He has also been funded by the National Health Research Development Program and the Medical Research Council of Canada, and leads an interdisciplinary team funded by PHIND. Dr. Gotlib has received the Distinguished Investigator Award from the National Alliance for Research in Schizophrenia and Affective Disorders, the Joseph Zubin Award for lifetime research contributions to the understanding of psychopathology, the APA Award for Distinguished Scientific Contribution, the APS Distinguished Scientist Award, and a MERIT award from NIMH. He has published over 500 scientific articles and has written or edited several books in the areas of depression and stress, including the Handbook of Depression with Constance Hammen, now in its 3rd edition. He is a Fellow of the American Psychological Association, the Association for Psychological Science, and the American Psychopathological Association, and is Past President of the Society for Research in Psychopathology.
