Tara I. Chang
Associate Professor of Medicine (Nephrology) at the Stanford University Medical Center
Medicine - Nephrology

Bio
Tara Chang, MD, MS is a board-certified nephrologist who enjoys taking care of patients with all types of kidney diseases. She is also a certified Hypertension Specialist, and has a particular interest in treating patients with high blood pressure. In addition to her patient care duties, Dr. Chang maintains an active clinical research program, which focuses on studying cardiovascular disease in patients with chronic kidney disease. She has received grant funding from the National Institutes of Health and the American Heart Association.

Dr. Chang speaks conversational Mandarin. She enjoys jogging, yoga, and spending time with her husband, son and twin daughters.

Clinical Focus
- Nephrology
- Hypertension
- Chronic kidney disease
- Dialysis

Academic Appointments
- Associate Professor, Medicine, Nephrology
- Member, Cardiovascular Institute

Administrative Appointments
- Director of Clinical Research, Stanford Division of Nephrology, (2016- present)

Professional Education
- Board Certification: Internal Medicine, American Board of Internal Medicine (2020)
- Board Certification: Nephrology, American Board of Internal Medicine (2020)
- Residency: University of California San Francisco Internal Medicine Residency (2006) CA
CURRENT RESEARCH AND SCHOLARLY INTERESTS

As a board-certified nephrologist, I see first-hand the pervasiveness of cardiovascular disease in patients with chronic kidney disease (CKD). As a trained epidemiologist and clinical researcher, I also see the lack of evidence available to guide treatment decision-making in CKD. Motivated by these evidence gaps, my research seeks to clarify questions about cardiovascular care in patients with CKD. My research specifically focuses on issues such as blood pressure control, coronary revascularization, and the comparative effectiveness of cardioprotective medications in patients with CKD, with the long-term goal of improving outcomes in these high-risk patients.

CLINICAL TRIALS

- CALM-2 - Controlling and Lowering Blood Pressure With the MobiusHD™, Recruiting
- Comparing Diuretic Strategies in Hospitalized Heart Failure, Not Recruiting
