#### ACADEMIC APPOINTMENTS

- Emeritus Faculty, Acad Council, Earth & Planetary Sciences
- Affiliate, Precourt Institute for Energy

#### ADMINISTRATIVE APPOINTMENTS

- Postdoctoral Fellow, Lawrence Berkeley Laboratory, (1984-1985)
- Assistant Professor of Geology, Stanford University, (1985-1990)
- Associate Professor of Geology, Stanford University, (1990-1993)
- Associate Professor Geological & Environmental Sciences, Stanford University, (1993-1996)
- Associate Dean for Academic Affairs, School of Earth Sciences, (1996-1999)
- Professor Geological & Environmental Sciences, Stanford University, (1996- present)
- Professor by Courtesy Materials Science and Engineering, Stanford University, (1997- present)
- Chariman, Dept. of Geological and Environmental Sciences, (1999-2004)
- Chairman, Dept. of Geological and Environmental Sciences, (2009-2012)
- member, University Committee on Postdoctoral Scholars, (2009-2010)
- member, School of Earth Sciences Council, (2012-2015)
- member, Faculty Senate Committee on Undergraduate Standard and Policies (C-USP), (2012-2014)

#### HONORS AND AWARDS

- Graduate Fellow, National Science Foundation (1977 - 1980)
- Member, National Science Foundation, Presidential Young Investigators (1986-1991)
- Fellow, American Ceramic Society (19--)
- Fellow, American Geophysical Union (19--)
- Fellow, Mineralogical Society of America (1990)
- Mineralogical Society of America Award, Mineralogical Society of America (1992)
- G.W. Morey Award, Glass and Optical Materials Division of the American Ceramic Society (1995)
- Fellow in Undergraduate Education, Bass University (2003-2008)
- Geochemistry Fellow, Geochemical Society and European Association of Geochemistry (2009)
- Bunsen Medal, European Geosciences Union (2009)

## **BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS**

- Member, School of Earth Sciences Computer Committee, Stanford University (1987 - 1999)
- Associate Editor, *American Mineralogist* (1990 - 1999)
- Freshman Advisor, Stanford University (1991 - 1999)
- Member, Earth Systems Steering Committee, Stanford University (1991 - 2002)
- Organizer (with D. Dingwell and P. McMillan), MSA Short Course "Structure, Dynamics and Properties of Silicate Melts" (1995 - 1995)
- Councillor, Mineralogical Society of America (1995 - 1997)
- University Undergraduate Advisory Council, Stanford University (1996 - 1999)
- Associate Dean for Academic Affairs, School of Earth Sciences, Stanford University (1996 - 1999)
- Member, Earth Sciences Council, Stanford University (1996 - 2007)
- Faculty Senate, Stanford University (1997 - 1999)
- Chairman, Dept. of Geological & Environmental Sciences, Stanford University (1999 - 2004)
- Invited speaker, International Silicate Melts Workshop (1999 - 1999)
- Invited speaker, Conference on NMR in Earth Sciences, Cambridge University (2000 - 2000)
- Invited Speaker, Corning Science Fellows Conference; Goldschmidt Conference in Geochemistry; ACS Rocky Mountain Conference on Analytical Chemistry; Varian NMR User's Conference; NSF Workshop on Solid-State Chemistry; Varian, Inc. NMR Group Seminar (2001 - 2001)
- Marsh O'Neill Award Committee, Stanford University (2001 - 2001)
- Member, Materials Council, Stanford University (2002 - 2006)
- Member, Judicial Affairs Board, Stanford University (2002 - 2003)
- Invited Speaker, American Ceramic Society National Meeting; Goldschmidt Conference on Geochemistry; International Mineralogical Association; Virginia Polytechnic Institute (2002 - 2002)
- Invited Speaker, Goldschmidt Conference on Geochemistry (2003 - 2003)
- Invited speaker, American Ceramic Society, Glass and Optical Materials Mtg.; AGU session on melt structure and properties; Plenary lecture: European Conference on Mineralogy and Spectroscopy (2004 - 2004)
- Chairman, School Undergraduate Program Committee, Stanford University (2004 - 2005)
- Invited Speaker, COMPRES workshop on high pressure melts, Albuquerque NM; Saint-Gobain Glass Research Center, Paris; Centre de Recherche sur les Matériaux à Haute Température, Orléans, France; Symposium on Structure and Properties of Silicate Glasses and Melts, Institut de Physique du Globe de Paris (2005 - 2005)
- Member, NSF review panel (2005 - 2005)
- Invited seminar, Centre de Recherche sur les Matériaux à Haute Température, Orleans, France (2005 - 2005)
- Humgrove Lecturer, University of Utrecht (2005 - 2005)
- Invited speaker, European Geophysical Union (2005 - 2005)
- Committee of Visitors, NSF Division of Materials Research (2005 - 2005)
- Plenary speaker, Silicate Melt Workshop, Ludwig-Maximilians-University, Munich (2005 - 2005)
- Guest Editor (with Roberto Moretti and Pascal Richet), Silicate Melts volume of "Chemical Geology" (2005 - 2005)
- Invited speaker, International Mineralogical Association conference; Materials Research Society national meeting (2006 - 2006)
- Guest editor (with G. Henderson and G. Calas), "Glasses and Melts" issue of "Elements" magazine (2006 - 2006)
- Allan Cox Medal committee, Stanford University (2007 - 2007)
- Invited Speaker, Canadian Society of Chemistry annual mtg., 5th Alpine NMR conference, 8th Silicate Melt Workshop, DOE Geofluids Workshop (2007 - 2007)
- Invited Speaker, Rocky Mountain Conference on Analytical Chemistry (2008 - 2008)
- Member, Nanoscale Sciences and Engineering Shared Facilities Program Committee (2008 - present)

- Chairman, Dept. of Geological and Environmental Sciences, Stanford University (2009 - 2012)
- Member, University Committee on Postdoctoral Scholars, Stanford University (2009 - 2010)
- Invited speaker, European Geosciences Union (Bunsen Medal Lecture); U.C. Davis, Dept. of Geology; PacRim Conference on Ceramic and Glass Technology; Institut de Physique du Globe, Paris; IUPAC Int. Conf. on High Temperature Chemistry (2009 - 2009)
- Invited speaker, Glass and Optical Materials Div., American Ceramic Society, annual mtg.; keynote speaker, Goldschmidt Conference on Geochemistry (2010 - 2010)
- Invited speaker, Glass and Optical Materials Div., American Ceramic Society, annual mtg.; NSF Workshop on Emerging Research in Ceramics, Carbon, Glasses and Composites; Vaughan Symposium, Rocky Mt. Conference on Analytical Chemistry; AGU annual mtg (2012 - 2012)
- keynote speaker, Goldschmidt Conference on Geochemistry; (2012 - 2012)
- Member, School of Earth Sciences Council, Stanford University (2012 - present)
- Invited Speaker, Corning "Realizing the Vision" symposium (2015 - present)
- Member, Faculty Senate Committee on Undergraduate Standards and Policy (C-USP), Stanford University (2012 - present)
- Invited Speaker, Corning Glass Research Summit (2014 - 2014)

## PROFESSIONAL EDUCATION

- PhD, UC Berkeley , Geology (1983)
- M.A., University of California, Berkeley , Geology (1980)
- A.B., Harvard University , Geological Sciences (1977)

### CURRENT RESEARCH AND SCHOLARLY INTERESTS

#### Research

My research is focused on the measurement of the structure and dynamics in (mostly) inorganic materials, with the goal of understanding and predicting their thermodynamic and transport properties. These in turn fundamentally control a wide range of geological and technological phenomena. My students, postdocs, and I work primarily on disordered materials, including minerals, glassy and molten silicates and oxides, and ceramics. Our primary research tool is nuclear magnetic resonance (NMR). The materials that we study come from the natural laboratory of the Earth or are synthesized in our own labs. The problems that we address are tied to large-scale processes in geology and geophysics, as well as to those in high-tech industries. Among the former are the mechanisms of viscous flow in magmas and of solid solution in minerals from the crust to the lower mantle; among the latter are the optimization of glasses for flat screen computer displays and optical data transmission and of oxide ceramics for fuel cells.

#### Teaching

I have long taught a course in introductory geochemistry for undergrads at the beginnings of their careers in Earth sciences. Topics range from the formation of the chemical elements in stellar interiors, to high pressure and temperature phase equilibria, to aqueous solution chemistry, formation of oil and coal, and even the origin of life. At the advanced level I give a course on thermodynamics and structure of minerals and melts aimed at all graduate students who work with these "geomaterials." Recently I have begun teaching a course for advanced undergrads and for grad students on igneous processes.

#### Professional Activities

Geochemical Society Fellow (2009); European Geosciences Union Bunsen Medal (2009); American Ceramic Society Morey Award (1995); Mineralogical Society of America Award (1992); NSF Presidential Young Investigator (1986-91); associate dean, School of Earth Sciences (1996-1999); chair, GES (1999-2004); participation in professional societies, scientific conferences, and proposal and journal reviews in geochemistry, geophysics, mineralogy, inorganic chemistry, glass science, ceramics, and solid-state NMR
