

Jeremy Goldhaber-Fiebert

Associate Professor of Medicine (Primary Care & Outcomes Research) and, by courtesy, of Health Research and Policy

Medicine - Primary Care Outcomes Research

Bio

BIO

Jeremy Goldhaber-Fiebert, PhD, is an Associate Professor of Medicine, a Core Faculty Member at the Centers for Health Policy/Primary Care and Outcomes Research, and a Faculty Affiliate of the Stanford Center on Longevity and Stanford Center for International Development. His research focuses on complex policy decisions surrounding the prevention and management of increasingly common, chronic diseases and the life course impact of exposure to their risk factors. In the context of both developing and developed countries including the US, India, China, and South Africa, he has examined chronic conditions including type 2 diabetes and cardiovascular diseases, human papillomavirus and cervical cancer, tuberculosis, and hepatitis C and on risk factors including smoking, physical activity, obesity, malnutrition, and other diseases themselves. He combines simulation modeling methods and cost-effectiveness analyses with econometric approaches and behavioral economic studies to address these issues. Dr. Goldhaber-Fiebert graduated magna cum laude from Harvard College in 1997, with an A.B. in the History and Literature of America. After working as a software engineer and consultant, he conducted a year-long public health research program in Costa Rica with his wife in 2001. Winner of the Lee B. Lusted Prize for Outstanding Student Research from the Society for Medical Decision Making in 2006 and in 2008, he completed his PhD in Health Policy concentrating in Decision Science at Harvard University in 2008. He was elected as a Trustee of the Society for Medical Decision Making in 2011.

Past and current research topics:

- Type 2 diabetes and cardiovascular risk factors: Randomized and observational studies in Costa Rica examining the impact of community-based lifestyle interventions and the relationship of gender, risk factors, and care utilization.

-Cervical cancer: Model-based cost-effectiveness analyses and costing methods studies that examine policy issues relating to cervical cancer screening and human papillomavirus vaccination in countries including the United States, Brazil, India, Kenya, Peru, South Africa, Tanzania, and Thailand.

- Measles, haemophilus influenzae type b, and other childhood infectious diseases: Longitudinal regression analyses of country-level data from middle and upper income countries that examine the link between vaccination, sustained reductions in mortality, and evidence of herd immunity.

- Patient adherence: Studies in both developing and developed countries of the costs and effectiveness of measures to increase successful adherence. Adherence to cervical cancer screening as well as to disease management programs targeting depression and obesity is examined from both a decision-analytic and a behavioral economics perspective.

- Simulation modeling methods: Research examining model calibration and validation, the appropriate representation of uncertainty in projected outcomes, the use of models to examine plausible counterfactuals at the biological and epidemiological level, and the reflection of population and spatial heterogeneity.

ACADEMIC APPOINTMENTS

- Associate Professor, Medicine - Primary Care Outcomes Research
- Associate Professor (By courtesy), Health Research & Policy
- Affiliate, Stanford Woods Institute for the Environment

Teaching

COURSES

2019-20

- Advanced Decision Science Methods and Modeling in Health: HRP 263, MED 263 (Win)
- Analysis of Costs, Risks, and Benefits of Health Care: BIOMEDIN 432, HRP 392 (Aut)
- Models for Understanding and Controlling Global Infectious Diseases: HUMBIO 154D (Spr)

2018-19

- Advanced Decision Science Methods and Modeling in Health: HRP 263, MED 263 (Win)

2017-18

- Advanced Decision Science Methods and Modeling in Health: HRP 263, MED 263 (Win)
- Analysis of Costs, Risks, and Benefits of Health Care: BIOMEDIN 432, HRP 392 (Aut)

STANFORD ADVISEES

Doctoral Dissertation Reader (AC)

Anneke Claypool, Michael Fairley, Alton Russell

Doctoral Dissertation Advisor (AC)

Matt Kaufmann, Tess Ryckman, Erik Wiesehan
