

Stanford

Rosanne Marie Siino

Lecturer
Management Science and Engineering

Bio

BIO

Rosanne was on the founding team of Netscape in the 1990s. She brings the same creativity, “think big” attitude and positive energy that launched the first commercially successful web browser to her teaching and consulting. After a long career in high-tech marketing, Rosanne received a doctorate in Management Science and Engineering from Stanford, where she has been a lecturer since 2007. Rosanne teaches undergraduate and graduate classes in organizational dynamics, and advises technology companies, startups, and nonprofits on effective teamwork, management and messaging.
