Bio

BIO

John Mitchell is the Mary and Gordon Crary Family Professor, professor of computer science, and by courtesy professor of electrical engineering and professor of education. He was previously Stanford Vice Provost for Teaching and Learning and chair of the Computer Science Department. As vice provost, his team worked with more than 500 Stanford faculty members and instructors on over 1,000 online projects for campus or public audiences and organized the Year of Learning to envision the future of teaching and learning at Stanford and beyond. As co-director of the Lytics Lab, Carta Lab and Pathways Lab, he has worked to improve educational outcomes through data-driven research and iterative design.

Mitchell's research focusses on programming languages, computer security and privacy, blockchain, machine learning, and technology for education. Sample publications include Reinforcement Learning for the Adaptive Scheduling of Educational Activities (CHI 2020), Automated Analysis of Cryptographic Assumptions in Generic Group Models (J. Cryptology, 2019), Evaluating the privacy properties of telephone metadata (PNAS 2016), and Third-party web tracking: Policy and Technology (IEEE S&P). He is the author of two textbooks, Foundations for Programming Languages (1996) and Concepts in Programming Languages (2002). With over 250 publications and over 30,000 citations, he has led research projects on a range of topics, been a consultant or advisor to many companies, and served as editor-in-chief of the Journal of Computer Security.

Mitchell's first research project in online learning started in 2009, when he and six undergraduate students built Stanford CourseWare, an innovative platform that expanded to support interactive video and discussion. CourseWare served as the foundation for initial flipped classroom experiments at Stanford and helped inspire the first massive open online courses (MOOCs) from Stanford.

ACADEMIC APPOINTMENTS

- Professor, Computer Science
- Professor (By courtesy), Electrical Engineering
- Professor (By courtesy), Graduate School of Education
- Faculty Affiliate, Institute for Human-Centered Artificial Intelligence (HAI)

ADMINISTRATIVE APPOINTMENTS

- Faculty Director, Hasso Plattner Institute of Design ("d.school"), (2023- present)

- Chair, Department of Computer Science, (2019- present)

HONORS AND AWARDS

- Mary and Gordon Crary Family Professor in the School of Engineering, Stanford University
- Elected, American Academy of Arts and Sciences
- Fellow, Association for Computing Machinery

PROFESSIONAL EDUCATION

- BS, Stanford University , Mathematics (1978)
- PhD, MIT , Computer Science (1984)

Research & Scholarship

RESEARCH INTERESTS

- Higher Education
- Teachers and Teaching
- Technology and Education

CURRENT RESEARCH AND SCHOLARLY INTERESTS

Programming languages, computer security and privacy, blockchain, machine learning, and technology for education

Teaching

COURSES

2024-25

- How Can Generative AI Help Us Learn?: CS 53N (Spr)
- MS Design Capstone Project 2: DESIGN 361B (Win)
- MS Design Capstone Project 3: DESIGN 361C (Spr)
- Trustworthy Machine Learning: CS 329T (Aut)

2023-24

- Design for Learning: Generative AI for Collaborative Learning: CS 498D, DESIGN 292, EDUC 449 (Aut)
- How Can Generative AI Help Us Learn?: CS 53N (Spr)
- Trustworthy Machine Learning: CS 329T (Aut)

2022-23

- Design for Learning: Co-Designing Connection and Community: DESIGN 292 (Aut)

2021-22

- Trustworthy Machine Learning: CS 329T (Spr)

STANFORD ADVISEES

Doctoral Dissertation Reader (AC)

Nicholas Mosier

Doctoral Dissertation Advisor (AC)

Jeongyeon Kim

Doctoral Dissertation Co-Advisor (AC)

Paul Crews, Jason Goldberg

Master's Program Advisor

Roman Gasiorowski, Jeremy Kim, Calvin Laughlin, Ariane Lee, Sean Mori, Ihyun Nam, Arjun Sharma, Ayush Singla, Ari Webb

Doctoral (Program)

Jeongyeon Kim, Sierra Wang
