Bio

BIO

Dr. Albert Chiou is a Clinical Associate Professor of Dermatology. He earned his Bachelor of Science from Stanford University and completed an MPhil in Chemistry, by research, from the University of Cambridge, where he was a Gates Cambridge Scholar. He received his medical degree from Harvard Medical School, where he also completed a joint business degree. Dr. Chiou performed his dermatology residency at Stanford University and served as Chief Resident in his final year. His clinical focus is in medical dermatology.

Dr. Chiou conducts clinical trials investigating new therapies for inflammatory and genetic skin diseases, along with evaluating artificial intelligence-driven decision support approaches for skin cancer and melanoma detection. He is active in supporting institutional research informatics efforts pertinent to clinical research and clinical trials across Stanford Medicine.

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

I am a clinical researcher interested in evaluating promising new diagnostic paradigms and treatments for serious or poorly treated, chronic skin conditions. My research currently includes:

Therapeutics:

- Treatments for itch from epidermolysis bullosa
- Treatments for chronic wounds for patients with recessive dystrophic epidermolysis bullosa (In collaboration with Dr. Jean Tang and Dr. Peter Marinkovich)
- Treatments for atopic dermatitis, psoriasis, and other inflammatory skin conditions

Diagnostics:

- Artificial intelligence approaches for melanoma and skin cancer early detection
- Imaging mass spectrometry for skin cancer margin analysis and diagnosis

I collaborate with other faculty within the Stanford Skin Innovation and Interventional Research Group (SIIRG) to conduct investigator initiated and sponsored clinical trials seeking to improve care for important dermatologic diseases
