#### BIO

I am originally from San Diego, California where I attended medical school and did a surgical internship at UCSD. While there, I was exposed to the field of Nuclear Medicine and became fascinated by molecular imaging and the burgeoning field of theranostics. I chose the Nuclear Medicine residency program at Stanford because it is one of the premier molecular imaging programs in the world, where some of the best known physicians and scientists in the field have trained before. Situated in Silicon Valley and rooted in a culture of collaboration, Stanford reaps the benefits from being at the intersection of technology, innovation, engineering and science to produce ground breaking research that continually pushes the imagination and limits of Nuclear Medicine. I am honored to be able to pursue my clinical interests and further my career in this environment.

#### CLINICAL FOCUS

- Nuclear Medicine
- Positron-Emission Tomography and Computed Tomography
- CT and SPECT
- Cardiac Gated SPECT Imaging

#### ACADEMIC APPOINTMENTS

- Clinical Assistant Professor, Radiology - Rad/Nuclear Medicine

#### BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS

- member, Society of Nuclear Medicine (2010 - present)
