## Research & Scholarship

---

### CURRENT RESEARCH AND SCHOLARLY INTERESTS

Girod's Image, Video, and Multimedia Systems Group explores algorithms and architectures for delivery, storage, retrieval, processing, and interactive use of multimedia signals and data, including audio and video, images, graphics and text, often in combination. They are currently most interested in mobile visual search, mobile augmented reality, and personalized media. Besides theoretical analyses and systematic experiments to study the underlying principles, they build real-time test beds and prototypes to validate and demonstrate their ideas.
