#### BIO

I was born in Oregon and raised in Iowa, where I cultivated my initial interest in science and medicine. I completed my undergraduate degree and medical school at the University of Iowa before heading to Stanford University for my internal medicine residency and oncology fellowship training. I chose this field to try my best in assisting patients during times of great need, and working to understand what is of greatest importance to them as they navigate their unique journey of cancer care. My clinical focus is in the care of patients with lymphoma and other hematologic cancers. My scholarly interests include better understanding the efficacy cancer therapeutics, improving patients' experience as they proceed through treatment, and promoting strength in medical education.
