Bio

BIO

Dr. Gerber is a critical care cardiologist with dual subspecialty training in cardiovascular and critical care medicine. He is a Clinical Assistant Professor at Stanford University Medical Center in the Department of Medicine's Division of Cardiovascular Medicine. He completed his residency in internal medicine, fellowship in cardiovascular medicine, and an additional fellowship in critical care medicine at Stanford University and joined as faculty in 2021.

Dr. Gerber manages the full spectrum of heart and vascular conditions with a focus on critically ill patients with life-threatening cardiovascular disease. He is active in medical education, teaching introductory echocardiography to Stanford medical students and residents, critical care echocardiography and point-of-care ultrasonography to Stanford's Critical Care Medicine fellows and was invited faculty at the Society of Critical Care Medicine's 2021 Advanced Critical Care Ultrasound Course. Finally, Dr. Gerber's research interests focus on optimizing cardiac intensive care, including working with the Critical Care Cardiology Trials Network (CCCTN), a national network of tertiary cardiac ICUs coordinated by the TIMI Study Group, and studying temporary mechanical circulatory support techniques, including extracorporeal membrane oxygenation (ECMO), to improve patient outcomes.
