Bio

BIO

Dr. Mark McGovern is a Professor in the Department of Psychiatry & Behavioral Sciences and, by courtesy, the Department of Medicine at Stanford University School of Medicine. He is the Co-Chief of the Division of Public Mental Health and Population Sciences in the Department of Psychiatry, and Medical Director of Integrated Behavioral Health in the Division of Primary Care and Population Health in the Department of Medicine.

Dr. McGovern's overarching goal is to improve access to the most effective care possible for anyone who needs it.

His primary research focus is implementation science, with a specific emphasis on integrated behavioral health services for persons with co-occurring substance use and psychiatric disorders, as they present in both primary care and specialty settings. Dr. McGovern has received a National Institute on Drug Abuse (NIDA) career development award and NIDA and National Institute on Alcohol Abuse and Alcoholism (NIAAA) grant funding to translate evidence-based therapies for complex patients into routine clinical settings. He has also received awards from the Robert Wood Johnson Foundation and the US Department of Health & Human Services' Substance Abuse and Mental Health Services Administration (SAMHSA) to advance a series of organizational measures of integrated service capacity. These measures, the Dual Diagnosis Capability in Addiction Treatment (DDCAT), Dual Diagnosis Capability in Mental Health Treatment (DDCMHT) and Behavioral Health Integration in Medical Care (BHIMC), have been widely adopted and are being used to implement evidence-based treatments in community settings and systems throughout the United States and globally.

Presently, he leads national, State of California, and local efforts to combat the US opioid epidemic. Dr. McGovern's work is focused on scaling up access to FDA-approved medications, in specialty care and in primary care and other general medical practice settings. His work is supported by NIDA, SAMHSA and the California Health Care Foundation. He is also actively collaborating with health systems, including Stanford Health Care and Intermountain Healthcare, on implementable and sustainable models of integrated behavioral health in primary care practice. This work is funded by the Department of Medicine, the Stanford-Intermountain Collaborative Grant Program, and the Patient Centered Outcomes Research Initiative (PCORI).

He is the PI on the National Coordinating Office of the Mental Health Technology Transfer Center (MHTTC) Network funded by SAMHSA. The MHTTC Network consists of 10 regional centers and 1 Native American/Tribal Center and 1 Latino/Hispanic Center--12 centers in all. The overarching goal of this network is the implementation and sustainment of evidence-based mental health prevention and treatment practices across US states and territories.

Dr. McGovern has been actively involved in the education of medical students, psychiatric residents and fellows, and clinical psychology interns at Stanford, and previously at the medical schools at Dartmouth (Lebanon, New Hampshire) and Northwestern University (Chicago, Illinois). From 2009 to 2017, he served as the Editor-In-Chief for the Journal of Substance Abuse Treatment (JSAT), the leading scientific journal dedicated to addiction treatment services and implementation research. Dr. McGovern is on the Core Faculty of the National Institute for Mental Health Implementation Research Institute and is a mentor to NIDA Fellows. He also serves on the NIDA Scientific Review Committee for Interventions for the Prevention and Treatment of Addiction.

CLINICAL FOCUS

- Psychology
- Addiction
- Behavioral Health Integration in Primary Care
- Implementation and sustainment science

ACADEMIC APPOINTMENTS

- Professor - Med Center Line, Psychiatry and Behavioral Sciences
- Professor - Med Center Line (By courtesy), Medicine - Primary Care and Population Health

ADMINISTRATIVE APPOINTMENTS

- Director, Center for Behavioral Health Services & Implementation Research, Department of Psychiatry, (2017- present)
- Medical Director, Integrated Behavioral Health, Division of Primary Care & Population Health, Department of Medicine, (2017- present)
- Co-Chief, Division of Public Mental Health & Population Sciences, Department of Psychiatry, (2018- present)

BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS

- Study Section Member, NIH Center for Scientific Review, Interventions for the Prevention & Treatment of Addictions (2016 - present)
- Member of National Board of Directors and Chairman of Quality and Program Committee, Phoenix House New York, New York (2017 - present)
- Editor Emeritus, Journal of Substance Abuse Treatment (2017 - present)
- Editor-In-Chief, Journal of Substance Abuse Treatment (2009 - 2017)

PROFESSIONAL EDUCATION

- PhD Training: Temple University - Dept of Psychology (1986) PA
- Fellowship, Northwestern University School of Medicine at Northwestern Memorial Hospital , Emergency and crisis intervention; Psychoanalytic psychotherapy (1985)
- Internship: Northwestern University (1984) IL
- BA, LaSalle College , Psychology (1977)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

Our translational research portfolio is designed to directly benefit patients and families by improving their chances of receiving evidence-based treatments at the right time and the right place--whenever and wherever needed.

Our aim is PRECISION IMPLEMENTATION--tailoring the most effective and cost-efficient strategies to achieve patient and family benefit.

We have active implementation research projects currently underway with:

- 1) the states of California and Washington;
- 2) the counties of Fairfax (Virginia), Multnomah (Oregon) and Santa Clara (California);
- 3) by invitation from the people of Navajo Nation;
- 4) systems of care including US Veterans Affairs, Stanford Health Care (California) and InterMountain (Utah); and
- 5) national (US states and territories) and regional health care organizations (Comprehensive Options for Drug Abuse, Inc; Portland, Oregon).

Our implementation and sustainment activities are supported by the National Institutes of Health (NIDA, NIAAA, NIMH) and the US Department of Health and Human Services Substance Abuse and Mental Health Services Administration (SAMHSA). Funding support may also be provided by the entities wherein the projects take place.

At present, the content of implementation and sustainment projects includes:

- a) integrating a unified model of behavioral health (mental health, addiction, chronic disease management) into routine medical practice settings such as primary care or emergency departments;
- b) integrating mental health and addiction services into routine specialty care practices; and
- c) expanding the access to and quality of using addiction medications for opioid use disorders in primary care and specialty practice settings.

All projects are co-designed and co-produced with key stakeholders involved in the implementation process, from top level leaders to care providers to patients and families.

Precision in measurement, procedural documentation, and transparency in data analyses and reporting ensure scientific reproducibility and public health impact brought to scale.
