

Stanford

Blake K. Scanlon, Ph.D.

Adjunct Lecturer, Psych/Public Mental Health & Population Sciences

Bio

BIO

The overarching aim of Dr. Scanlon's research is to develop and evaluate low-cost, pragmatic and clinically translatable methods for improving management of neurodegenerative disease and dementia. To that end, the Caregiver Technology Division of the Scanlon Lab aims to enhance patient- and family-centered care through novel, broadly customizable, and highly scalable caregiver interventions. In parallel, the Neurodegenerative Division of the Scanlon Lab focuses on the development and application of cognitive, neuropsychiatric, and biological markers for the initiation and progression of neurodegeneration.

Dr. Scanlon received his bachelor's degree in Neuroscience and doctorate in Clinical Health Psychology from the University of Miami. After concluding his clinical internship in Geropsychology/Neuropsychology at the VA Palo Alto Health Care System (VAPAHCS), he completed fellowships in Aging and Dementia at Stanford University School of Medicine and VAPAHCS. Dr. Scanlon is currently a VA Career Development Awardee in the Sierra-Pacific Mental Illness Research, Education, and Clinical Center (MIRECC) and Stanford/VA Aging Clinical Research Center where his work focuses on developing and evaluating low-cost, pragmatic and clinically translatable methods for improving management of neurodegenerative disease and dementia. He also serves as Co-Director of the Stanford/VA California Alzheimer's Disease Center, Chair of the VAPAHCS Dementia Committee, and Co-Chair of the Department of Veterans Affairs VISN 21 Dementia Committee.
