Grace Gengoux

Clinical Professor, Psychiatry and Behavioral Sciences - Child & Adolescent Psychiatry and Child Development

Curriculum Vitae available Online

CLINICAL OFFICE (PRIMARY)

• Stanford Children's Child and Adolescent Psychology Clinic

401 Quarry Rd MC 5719 Stanford, CA 94305

Bio

BIO

Grace Gengoux, Ph.D., BCBA-D, is a Clinical Professor, Director of the Autism Intervention Clinic, and the Well-being Director within Stanford University's Department of Psychiatry and Behavioral Sciences. Along with colleagues at Stanford, Dr. Gengoux has written a new book focused on professional well-being and practical strategies to promote resilience for providers of mental health care. Dr. Gengoux is also a licensed clinical psychologist with expertise in training parents to promote the healthy development of social skills in their children and manage challenging behavior using positive behavioral approaches. Dr. Gengoux has published peer-reviewed journal articles and book chapters on treatments for autism. She has specialized training in Pivotal Response Treatment (PRT), having completed her doctoral studies under the mentorship of Drs. Robert and Lynn Koegel. Dr. Gengoux oversees the PRT group parent training program at Stanford, supervises postdoctoral fellows providing PRT clinical treatment, and has completed multiple clinical trials evaluating the effects of PRT on the social-communication competence of young children with autism. Dr. Gengoux serves as Associate Editor for the Journal of Positive Behavior Interventions. Dr. Gengoux received her Ph.D. in Clinical Psychology from the University of California Santa Barbara and completed her clinical internship and postdoctoral fellowship at the Yale Child Study Center, before joining the Stanford University School of Medicine clinical faculty in 2010.

CLINICAL FOCUS

- · Wellness Programs
- Autism Spectrum Disorder
- Social Behavior
- Parent-Child Relations
- Clinical Child and Adolescent Psychology

ACADEMIC APPOINTMENTS

- Clinical Professor, Psychiatry and Behavioral Sciences Child & Adolescent Psychiatry and Child Development
- Member, Maternal & Child Health Research Institute (MCHRI)

ADMINISTRATIVE APPOINTMENTS

- Associate Chair, Faculty Engagement and Well-being, Stanford Department of Psychiatry and Behavioral Sciences, (2021- present)
- Autism Intervention Clinic Director, Stanford Division of Child & Adolescent Psychiatry, (2019-present)
- Psychiatry Department Well-being Director, Stanford University School of Medicine, (2019-present)

BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS

• Board Member, AbilityPath (formerly Gatepath) (2011 - 2020)

PROFESSIONAL EDUCATION

- Board Certification: Behavior Analyst, Behavior Analyst Certification Board (2009)
- PhD Training: University of California Santa Barbara (2008) CA
- Fellowship: Yale University Child Study Center (2009) CT
- Internship: Yale University Child Study Center (2008) CT

Research & Scholarship

RESEARCH INTERESTS

- Child Development
- Early Childhood
- · Leadership and Organization
- Literacy and Language
- Motivation
- Parents and Family Issues
- Professional Development
- Psychology
- Special Education

CURRENT RESEARCH AND SCHOLARLY INTERESTS

Stanford Autism Intervention Clinic

The Autism Intervention Clinic is founded on a commitment to family-focused evaluation and treatment using the best available evidence-based methods. Our treatment philosophy embodies an emphasis on improving parent empowerment and providing parent training to make meaningful improvements in family quality of life. We are particularly interested in designing and evaluating cost-effective treatments which can be easily implemented in community settings.

For treatment of young children with Autism Spectrum Disorder (ASD), we have developed effective group-based programs for treatment of core communication and social deficits in the preschool years using naturalistic developmental behavioral interventions such as Pivotal Response Treatment (PRT) and we have investigated the delivery of these treatments in home and community settings in several randomized controlled trials.

Following the success of the PRT program, several additional parent training program models have been developed at Stanford, including a clinical trial of a Developmental Reciprocity Treatment program (PI: Hardan) and a pilot program evaluating telehealth delivery of PRT. In partnership with the community agency AbilityPath (formerly Gatepath/Abilities United), Dr. Gengoux also led an innovative inclusive social skills research program focused on improving peer initiations made by children with ASD (Social SUCCESS).

Our group also recently completed in initial investigation of a novel group program using evidence-based strategies (Acceptance, Mindfulness, Optimism, Resilience; AMOR) to reduce parent stress and improve well-being. In partnership with Board Certified Behavior Analyst, Devon White, Drs. Gengoux and Hardan have launched the PAL program (Preschool Autism Lab) for investigation of novel therapies for young children with ASD in a center-based early intervention classroom.

Department of Psychiatry Well-being Workgroup

Dr. Gengoux leads a vibrant and diverse group of faculty, staff, and trainees engaged in initiatives focused on enhancing broad aspects of professional fulfillment, including culture of wellness, efficiency of practice, and personal resilience. Dr. Grace Gengoux represents our department in the School of Medicine Well-being Directors Council and has been leading efforts to enhance well-being for all members of our Department community over the past 3 years.

Our focus is on tangible action we can take to enhance connection and belonging, self-compassion and leadership development, and meaningful work consistent with our professional values.

CLINICAL TRIALS

- A Center Based Study of Pivotal Response Treatment for Preschoolers With Autism, Recruiting
- Improving Access to Pivotal Response Treatment (PRT) Via Telehealth Parent Training, Recruiting
- Neuroimaging Predictors of Improvement to Pivotal Response Treatment (PRT) in Young Children With Autism, Recruiting
- · An Evaluation of a Developmentally-Based Parent Training Program for Children With Autism, Not Recruiting
- · Parent Training to Enhance Social Success for Children With Autism Spectrum Disorder, Not Recruiting
- · Social Motivation Intervention for Children With Autism Spectrum Disorder: Improving Peer Initiation, Not Recruiting
