Bio

BIO

Dr. Teuteberg completed residency training in Internal Medicine at the University of Chicago and a Palliative Medicine Fellowship at Massachusetts General Hospital. She joined the faculty at Stanford in 2017 and currently sees patients as a part of the inpatient palliative care consult team at Stanford Healthcare.

She has been the clinical director or Stanford Medicine's implementation of the Ariadne Labs' Serious Illness Care Program since its inception in 2018. Her interests include communication skills training, leveraging predictive algorithms to identify patients who would most benefit from serious illness conversations, how to empower non-physician clinical team members to participate in this work, and best practice for EHR builds related to advance care planning.
