

Joseph Cole McGrath

Child Psychiatry Research Coordinator, Psychiatry and Behavioral Sciences - Child & Adolescent Psychiatry and Child Development

Bio

BIO

Joseph McGrath graduated with honors from Stanford University with his B.S. in Human Biology, concentrating in neuroscience and psychopathology. Working with the Autism and Developmental Disorders Research Program (ADDRP), he currently coordinates the Autism Center of Excellence (ACE) Sleep Medication Clinical Trials. Additionally, Joseph works in the Preschool Autism Lab (PAL) as a registered behavior technician for children with autism. Interested in the interplay between psycho- and pharmacotherapies, Joseph plans to attend medical school, hoping his exploration will inform a future in clinical psychiatric research.
