Bio

BIO

I am a medical oncology fellow with a clinical focus on breast cancer, and a research focus on examining cancer care delivery and resource allocation in both high- and low-income contexts. I am currently in my final year of fellowship, working on a Masters in health policy, and doing post-doctoral research on a T32 in the health policy department. My post-doctoral work is divided between domestic policy research, which focuses on analyzing cost and care variation, and global oncology projects, which concentrate on implementation and care delivery.
