Atherton, CA 94027

Tel (650) 362-2500 Fax (650) 362-2584

Bio

BIO

Dr. Pitts is a board-certified pediatrician. She has served as a clinical instructor and assistant clinical professor (affiliated) in the Department of Pediatrics at Stanford University School of Medicine.

She provides care to children and adolescents. Among the services she delivers are well check-ups, vaccinations, acute care, mental health support, and preventive care.

When patients meet with Dr. Pitts, it is important to her that they always feel respected and heard. If they are not ready or able to answer a question, or if they feel more at ease with a different approach to their appointment, she will always honor how they are feeling.

Dr. Pitts also works with the community to strengthen the systems that support healthy children and families. She has extensive experience collaborating with community-based organizations and government agencies. Her experience includes serving as a physician partner to the Adverse Childhood Experiences (ACEs) Aware Initiative. This program develops methods to screen patients and create treatment plans designed to help them heal from the impacts of trauma and toxic stress.

Her leadership experience includes co-founding POWER: Pediatricians Organizing and Working to End Racism and developing diversity, equity, and inclusion initiatives within health institutions. As an invited speaker at regional and national events, she has made many presentations to her peers. She also served as a health equity panelist for the National Academies of Sciences, Engineering and Medicine.

Dr. Pitts speaks both English and Spanish.
