

QiLiang “Q” Chen

Instructor, Anesthesiology, Perioperative and Pain Medicine

CLINICAL OFFICE (PRIMARY)

- Office of Student Affairs

251 Campus Dr Rm 323

MSOB

Stanford, CA 94305

Tel (650) 723-6861 Fax (650) 725-0009

Bio

BIO

QiLiang “Q” Chen, MD, PhD, is a pain management anesthesiologist and system neuroscientist at Stanford University and VA Palo Alto Healthcare System (VAPAHCS). He specializes in the treatment of complex chronic pain disorders, such as headaches, migraines, orofacial pain, chronic post-traumatic pain, and chronic post-surgical pain.

Dr. Chen obtained his undergraduate degrees in chemistry and clinical laboratory science from University of Wisconsin - Madison. He then received his MD and PhD in Neuroscience, with a focus on the basic brainstem circuits and mechanisms of endogenous pain modulation, at Oregon Health and Science University. After graduating from medical school, he joined Stanford as an anesthesiology resident in the Fellowship in Anesthesia Research and Medicine (FARM) program, and later completed his subspecialty fellowship training in Pain Management.

He now practices pain medicine and anesthesiology at Stanford and VAPAHCS. He continues his circuit-focused neuroscience research in the basic mechanisms of post-traumatic pain, with the goals of translating this fundamental knowledge to patient care and providing potential new therapeutic targets to help those with pain after injury and polytrauma.

ACADEMIC APPOINTMENTS

- Instructor, Anesthesiology, Perioperative and Pain Medicine

HONORS AND AWARDS

- FAER Mentored Research Training Grant (FAER-MRTG), American Society of Anesthesiologists (ASA) /Foundation for Anesthesia Education and Research (FAER) (2023-2025)
- ASA Annual Meeting Best of Abstracts, American Society of Anesthesiologists (ASA) (2022)
- ASPN Innovation Summit Fellow Scholarship, American Society of Pain and Neuroscience (ASPN) (2022)
- IASP Travel Award, International Association for the Study of Pain (IASP) (2022)
- Stanford Department of Anesthesiology Resident Research Award, Stanford University (2022)

- ASA FAER Resident Abstract 1st Place, American Society of Anesthesiologists (ASA) /Foundation for Anesthesia Education and Research (FAER) (2021)
- ASA FAER Resident Scholar, American Society of Anesthesiologists (ASA) /Foundation for Anesthesia Education and Research (FAER) (2021)
- Trainee Professional Development Award, Society for Neuroscience (SfN) (2021)
- OHSU Exemplary Future Scientist, Oregon Health & Science University (2017)
- Combining Clinical and Research Careers in Neuroscience Training Award, NIH/NINDS/AUPN/ANA/CNS (2016)
- OHSU 3-Minute Thesis Competition 2nd Place, Oregon Health & Science University (2015)
- F31 Individual National Research Service Award, NIH/NINDS (2014-2016)
- Roadmap Scholar Award, Oregon Health & Science University (2014-2015)
- Senate Fund, Oregon Health & Science University (2014, 2015, 2018)
- Excellence in Pain Training Award, Oregon Health & Science University (2014)
- N.L. Tartar Trust Fellowship, Oregon Health & Science University (2013)
- Research Week Top Poster Award, Oregon Health & Science University (2013)
- St. Mary’s Volunteer Scholarship, St. Mary’s Health Care System (2010)
- CeO/TRIO Outstanding Mentor Award, University of Wisconsin (2008, 2009)
- GEAR UP Scholarship, University of Wisconsin (2006-2008)
- Charles Loufek Kimport Memorial Scholarship, Madison Community Foundation (2005-2009)
- Friends of Meriter Scholarship, Meriter Foundation (2005)

PROFESSIONAL EDUCATION

- Fellowship: Stanford University Pain Management Fellowship (2023) CA
- Board Certification: Anesthesia, American Board of Anesthesiology (2023)
- Residency, Stanford University, Anesthesiology Residency , CA (2022)
- Internship, Stanford University, General Surgery Residency , CA (2019)
- MD, Oregon Health & Science University, Medicine , OR (2018)
- PhD, Oregon Health & Science University, Neuroscience , OR (2016)
- MT, University of Wisconsin - Madison, Clinical Laboratory Science , WI (2010)
- BS, University of Wisconsin - Madison, Chemistry , WI (2010)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

My research focuses on understanding the plasticity in pain-modulating circuits in pathological pain states. I started with defining a basic functional framework that links the pain-transmission system to the pain-modulation system, through which I explored the central mechanism of sensitization in chronic pain after a peripheral injury. Based on this fundamental observation, my work now focuses on investigating the pathophysiology and the role of endogenous opioids in chronic pain related to brain injury and other forms of trauma, a topic especially relevant to chronic post-traumatic pain sufferers. Clinically, I am exploring the use of advance image-guidance in pain interventions for treating complex headache and craniofacial pain. Ultimately, I hope to translate these fundamental knowledge and technologies to patient care and provide potential new therapeutic targets to help those with pain after head injury and polytrauma.

Teaching

GRADUATE AND FELLOWSHIP PROGRAM AFFILIATIONS

- Neurosciences (Phd Program)

- Pain Management (Fellowship Program)
