## Antoine Falisse

Research Engineer

Wu Tsai Human Performance Alliance

### Bio

---

#### BIO

Dr. Falisse is a postdoctoral fellow in Bioengineering working on computational approaches to study human movement disorders. He primarily uses optimization methods, biomechanical modeling, and data from various sources (wearables, videos, medical images) to get insights into movement abnormalities and design innovative treatments and rehabilitation protocols.

Dr. Falisse received his PhD from KU Leuven (Belgium) where he worked on modeling and simulating the locomotion of children with cerebral palsy. His research was supported by the Research Foundation Flanders (FWO) through a personal fellowship. Dr. Falisse received several awards for his PhD work, including the David Winter Young Investigator Award, the Andrzej J. Komor Young Investigator Award, the VPH Thesis Award in In Silico Medicine, and the KU Leuven Research Council Award in Biomedical Sciences.

#### ACADEMIC APPOINTMENTS

- Research Engineer, Wu Tsai Human Performance Alliance
- Member, Wu Tsai Human Performance Alliance

#### HONORS AND AWARDS

- Best Doctoral Thesis Award: Runner-up, The European Society of Biomechanics (2020)
- Best VPH Thesis in In Silico Medicine Award, The Virtual Physiological Human (VPH) Institute (2020)
- Research Council Award, KU Leuven (2020)
- Andrzej J. Komor Award, The International Society of Biomechanics: Technical Group on Computer Simulation (2019)
- David Winter Award, The International Society of Biomechanics (2019)

#### PROFESSIONAL EDUCATION

- Ph.D., KU Leuven , Biomedical Sciences (2019)
- M.S., UC Louvain , Biomedical Engineering (2014)
- B.S., UC Louvain , Engineering Science (2012)

### Research & Scholarship

---

#### LAB AFFILIATIONS

- Scott Delp, Neuromuscular Biomechanics Lab (10/16/2020)

## Publications
