Maria Viteri

Ph.D. Student in Biology, admitted Autumn 2017

Bio

BIO

My research lies at the intersections of conservation, ecology, and paleontology. Specifically, I am interested in tracking faunal community change over time to create a deeper context for the biodiversity crises of today and tomorrow. At Stanford I am working on discerning the fingerprints of the Anthropocene on small mammal communities in the San Francisco Bay Area using skeletal remains from raptor pellets and archaeological sites.

HONORS AND AWARDS

- Awardee, NSF GRFP (2018-2021)

EDUCATION AND CERTIFICATIONS

- B.S., University of Chicago , Biology: Ecology and Evolution (2016)

STANFORD ADVISORS

- Elizabeth Hadly, Doctoral (Program)
- Elizabeth Hadly, Doctoral Dissertation Advisor (AC)
