

Stanford

Haik Kalantarian

Postdoctoral Research Fellow, Systems Medicine

Bio

BIO

I am a Postdoctoral Fellow in the Wall Lab at Stanford University, investigating novel therapies and outcome measures for autism using computer vision and wearables. I completed my Doctorate in the Department of Computer Science at the University of California, Los Angeles. I am generally interested in applications of mobile and wearable systems in health, with an emphasis on end-to-end system design.

PROFESSIONAL EDUCATION

- Bachelor of Science, University of Washington , Electrical Engineering (2011)
- Master of Science, University of California, Los Angeles , Electrical Engineering (2013)
- Doctor of Philosophy, University of California, Los Angeles , Computer Science (2016)
