#### BIO

Susan Ruyu Qi, MD, is an Ophthalmology Resident (PGY4) from Canada currently at Stanford for a Master of Science program in Clinical Informatics Management. She is passionate about innovation in medicine, particularly the role of Artificial Intelligence in the field of ophthalmology. She was Editor in Chief of one of the first Medium publications dedicated to AI in Healthcare back in 2017.

In her spare time, she has completed the Machine Learning Certificate from Stanford on Coursera and is pursuing an online MBA program at Quantic School of Business. In residency, her research interest focused on Immediately Sequential Bilateral Cataract Surgery (ISBCS), Topography-guided LASIK outcomes, and the clinical trial of a novel retinal oximetry device, Zilia Ocular.

Having grown up in Montreal, Canada and China, she is fully fluent in English, French and Mandarin Chinese, and works occasionally as a medical translator. She holds a Doctor of Medicine (M.D.) degree from Université de Montréal.
