

Ronglih Liao

Professor of Medicine (Cardiovascular Medicine)

Medicine - Cardiovascular Medicine

Bio

BIO

Dr. Liao is a Professor of Medicine and co-Director of Stanford Cardiac Amyloid Center. The major goal of her research program focuses on understanding the mechanisms that underlie the pathophysiology of heart failure and developing novel treatments to combat this process. Her laboratory has played an international leading role in the study of amyloid light chain (AL) cardiomyopathy, a rare and fatal form of cardiovascular disease. We have described the underlying pathophysiologic basis for amyloid cardiomyopathy and found that the circulating amyloidogenic light chain proteins that characterize this disease directly result in a specific cardiotoxic response. Consequently, our research work has redefined AL cardiomyopathy and has raised new treatment approaches. More recently, her research efforts have expanded to include transthyretin (ATTR) cardiac amyloidosis.

In line with her goal of revealing novel therapeutic strategies for patients with cardiovascular disease, our efforts have also focused on characterizing and harnessing endogenous cardiac regenerative mechanisms. Her laboratory initially demonstrated the therapeutic potential of exogenous primitive muscle cells delivered to the injured heart. This work was among the earliest milestones in the field and served as the basis for an international trial of cell-based therapy. Subsequently, Liao lab identified and characterized a population of cardiac progenitor cells and its relationship and dynamic activity following cardiac injury in the adult heart. Her laboratory aims to reveal the molecular mechanisms regulating the endogenous regenerative capacity of the heart and to harness such repair mechanisms for the treatment of cardiovascular disease. Dr. Liao has lectured extensively on both amyloid cardiomyopathy and stem cell biology, and have maintained a history of independent NIH funding in these areas for more than two decades.

Over the course of her academic career, she has taken the greatest pride in mentoring the next generation of scientists. Dr. Liao has had the privilege to supervise several dozen students, postdoctoral fellows, and junior faculty, many of whom have gone on to independent academic careers at the highest institutions. Her contribution to the advancement of scientific knowledge also includes lecturing at various university and academic institutions as well as at scores of conferences and symposia locally, nationally, and internationally.

ACADEMIC APPOINTMENTS

- Professor, Medicine - Cardiovascular Medicine
- Member, Cardiovascular Institute
- Member, Maternal & Child Health Research Institute (MCHRI)

ADMINISTRATIVE APPOINTMENTS

- Co-Director, Stanford Amyloid Center, (2017- present)

BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS

- Associate Director, Cardiac Muscle Research Laboratory, Boston University School of Medicine (1997 - 2003)
- Co-Director, Cardiac Muscle Research Laboratory, Boston University School of Medicine (2003 - 2005)
- Director, Integrated Cardiovascular Physiology Laboratory, Department of Medicine, Boston University School of Medicine (2004 - 2005)
- Director, Cardiac Muscle Research Laboratory, Department of Medicine, Brigham and Women's Hospital (2005 - present)
- Director, Brigham and Women's Hospital Cardiovascular Physiology Core (2010 - present)
- Vice Chair, Basic Cardiovascular Sciences Council, American Heart Association (2014 - 2016)
- Chair, Basic Cardiovascular Sciences Council, American Heart Association (2016 - 2018)
- Co-Director, Stanford Amyloid Center (2017 - present)
- Director, Brigham and Women's Hospital Physiological NMR Core (2017 - present)

PROFESSIONAL EDUCATION

- Postdoc, Brigham and Women's Hospital and Harvard Medical School , Myocardial energetics (1991)
- Postdoc, Beth Israel Hospital and Harvard Medical School , Cardiac physiology (1990)
- M.A. (hon), Harvard University , Biomedical Science (2015)
- PhD, University of Alabama at Birmingham , Biophysics (1990)

Yan, J. n., Young, M. E., Cui, L. n., Lopaschuk, G. D., Liao, R. n., Tian, R. n.
2009; 119 (21): 2818–28
 - **A novel role for tumor necrosis factor-like weak inducer of apoptosis (TWEAK) in the development of cardiac dysfunction and failure.** *Circulation*
Jain, M. n., Jakubowski, A. n., Cui, L. n., Shi, J. n., Su, L. n., Bauer, M. n., Guan, J. n., Lim, C. C., Naito, Y. n., Thompson, J. S., Sam, F. n., Ambrose, C. n., Parr, et al
2009; 119 (15): 2058–68
 - **Disruption of striated preferentially expressed gene locus leads to dilated cardiomyopathy in mice.** *Circulation*
Liu, X. n., Ramjiganesh, T. n., Chen, Y. H., Chung, S. W., Hall, S. R., Schissel, S. L., Padera, R. F., Liao, R. n., Ackerman, K. G., Kajstura, J. n., Leri, A. n., Anversa, P. n., Yet, et al
2009; 119 (2): 261–68
 - **Role of the ATP-binding cassette transporter Abcg2 in the phenotype and function of cardiac side population cells.** *Circulation research*
Pfister, O. n., Oikonomopoulos, A. n., Sereti, K. I., Sohn, R. L., Cullen, D. n., Fine, G. C., Mouquet, F. n., Westerman, K. n., Liao, R. n.
2008; 103 (8): 825–35

- **Evolving cell-based therapies for heart failure patients.** *Current treatment options in cardiovascular medicine*
Podesser, B. K., Bauer, M. n., Liao, R. n.
2008; 10 (4): 358–67
- **Isolation, culture, and functional analysis of adult mouse cardiomyocytes.** *Methods in molecular medicine*
Liao, R. n., Jain, M. n.
2007; 139: 251–62
- **Long-term effects of increased glucose entry on mouse hearts during normal aging and ischemic stress.** *Circulation*
Luptak, I. n., Yan, J. n., Cui, L. n., Jain, M. n., Liao, R. n., Tian, R. n.
2007; 116 (8): 901–9
- **Adult stem cells and heart regeneration.** *Expert review of cardiovascular therapy*
Sohn, R. L., Jain, M. n., Liao, R. n.
2007; 5 (3): 507–17
- **Transcription factor CHF1/Hey2 suppresses cardiac hypertrophy through an inhibitory interaction with GATA4.** *American journal of physiology. Heart and circulatory physiology*
Xiang, F. n., Sakata, Y. n., Cui, L. n., Youngblood, J. M., Nakagami, H. n., Liao, J. K., Liao, R. n., Chin, M. T.
2006; 290 (5): H1997–2006
- **Selective loss of fine tuning of Gq/11 signaling by RGS2 protein exacerbates cardiomyocyte hypertrophy.** *The Journal of biological chemistry*
Zhang, W. n., Anger, T. n., Su, J. n., Hao, J. n., Xu, X. n., Zhu, M. n., Gach, A. n., Cui, L. n., Liao, R. n., Mende, U. n.
2006; 281 (9): 5811–20
- **Restoration of cardiac progenitor cells after myocardial infarction by self-proliferation and selective homing of bone marrow-derived stem cells.** *Circulation research*
Mouquet, F. n., Pfister, O. n., Jain, M. n., Oikonomopoulos, A. n., Ngoy, S. n., Summer, R. n., Fine, A. n., Liao, R. n.
2005; 97 (11): 1090–92
- **Mesenchymal stem cells in the infarcted heart.** *Coronary artery disease*
Jain, M. n., Pfister, O. n., Hajjar, R. J., Liao, R. n.
2005; 16 (2): 93–97
- **Cardiac-specific overexpression of GLUT1 prevents the development of heart failure attributable to pressure overload in mice.** *Circulation*
Liao, R. n., Jain, M. n., Cui, L. n., D'Agostino, J. n., Aiello, F. n., Luptak, I. n., Ngoy, S. n., Mortensen, R. M., Tian, R. n.
2002; 106 (16): 2125–31
