Bio

BIO

Dr. Alice Bertaina completed her MD degree at the University of Pavia in Italy, her fellowship in hematopoietic stem cell transplantation (HSCT) at the Bambino Gesù Children's Hospital in Rome, and her PhD degree in Immunology and Biotechnology at Tor Vergata University in Rome. Until joining Stanford University in 2017, she was Head of the Stem Cell Transplant Unit in the Department of Hematology and Oncology at the Bambino Gesù Children's Hospital in Rome (this institution currently has the largest number of children transplanted with hematopoietic progenitors/stem cells in Europe).

Dr. Bertaina is an expert in the field of allogeneic HSCT in pediatric patients affected by hematological malignancies or nonmalignant disorders. In particular, she has pioneered the novel approach of graft manipulation based on the physical elimination of alfa/beta T cells and B cells. Dr. Bertaina has excellent clinical and biological expertise, as demonstrated by her publications in the field of pediatric hematology and oncology. Moreover, she is expert in different aspects of immunological reconstitution of children given an allograft of hematopoietic stem cell, paying particular attention to innate immunity.

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

Dr. Bertaina is a highly experienced clinician and will play a key role in supporting Section Chief Dr. Rajni Agarwal and Clinical Staff in the Stem Cell Transplant Unit at Lucile Packard Children's Hospital. She will also continue her research on immune recovery and miRNA, understanding the mechanisms underlying immune reconstitution, Graft-versus-Host Disease (GvHD), and leukemia relapse after allogeneic HSCT in pediatric patients affected by hematological malignant and non-malignant disorders.
