## Research & Scholarship

---

### CURRENT RESEARCH AND SCHOLARLY INTERESTS

My research is in the area of cancer control. I am primarily interested in investigating the impact of cancer treatments on sleep, fatigue and quality of life. My current projects include investigating the impact of behavioral and pharmacological interventions on improving sleep, fatigue and quality of life in cancer patients and survivors. I am also investigating the relationship between dysregulation of the neuroendocrine stress response system, sleep problems, fatigue, and disease progression in cancer patients with primary and metastatic cancers.

### CLINICAL TRIALS

- Brief Behavioral Therapy in Improving Sleep Disorders in Patients With Stage I-III Breast Cancer Undergoing Chemotherapy, Recruiting
- Comparing Brief Behavioral Therapy (BBT-CI) and Healthy Eating Education Learning (HEAL) for Cancer-Related Sleep Problems While Receiving Chemotherapy, Recruiting
- Acupuncture for Sleep Disruption in Cancer Survivors, Not Recruiting
- Assessment of Patient Experience During Treatment for Cancer, Not Recruiting
- Brief Behavioral Intervention for Insomnia During Chemotherapy, Not Recruiting
- Intellectual Impairment in Women With Breast Cancer, Not Recruiting
- Management of Insomnia in Breast Cancer Patients, Not Recruiting
- Phase II Early Behavioral Intervention in BMT w/ Sleep Disturbance-Assess QOL+Fatigue+Cognitive f(x), Not Recruiting
