#### BIO

A social psychologist at Stanford University, Jennifer Eberhardt investigates the consequences of the psychological association between race and crime. Through interdisciplinary collaborations and a wide ranging array of methods—from laboratory studies to novel field experiments—Eberhardt has revealed the startling, and often dispiriting, extent to which racial imagery and judgments suffuse our culture and society, and in particular shape actions and outcomes within the domain of criminal justice.

### Research & Scholarship

#### CURRENT RESEARCH AND SCHOLARLY INTERESTS

My research is on race and inequality. I am especially interested in examining race and inequality in the criminal justice context. My most recent research focuses on how the association of African Americans with crime might matter at different points in the criminal justice system and how this association can affect us in surprising ways.
