## Tyler Edward Cork

Ph.D. Student in Bioengineering, admitted Autumn 2018

### Bio

---

#### BIO

I received my B.S. in Biomedical Engineering and M.S. in Electrical Engineering from the Catholic University of America in Washington DC. While attending graduate school at CUA, I worked as a post-baccalaureate fellow at the National Institutes of Health in the Laboratory of Diagnostic Radiology Research under Dr. David A. Bluemke. During my fellowship at the NIH, I primarily worked on quantitative image analysis for a prototype whole-body photon-counting computed tomography scanner. After my time at CUA and the NIH, I received my M.S. in Bioengineering from the University of California - Los Angeles while conducting research under Dr. Daniel Ennis.

#### EDUCATION AND CERTIFICATIONS

- Master of Science, University of California Los Angeles (2018)
- Master of Science, University of California - Los Angeles , Bioengineering (2018)
- Master of Science, The Catholic University of America , Electrical Engineering (2017)
- Bachelor of Science, The Catholic University of America , Biomedical Engineering (2015)

#### PERSONAL INTERESTS

Snowboarding, surfing, and electric guitar.

### Research & Scholarship

---

#### CURRENT RESEARCH AND SCHOLARLY INTERESTS

Currently, I am involved in two main projects. The first is developing 3D printing techniques to improve the accuracy of ex vivo geometrical and microstructural cardiac modeling from in vivo cardiac MR acquisitions. The second is applying machine learning applications to MRI data as a way to improve overall image quality and reduce acquisition time.

#### LAB AFFILIATIONS

- Daniel Ennis, Cardiac Cardiac Magnetic Resonance Group (8/13/2018)

### Professional

---

#### WORK EXPERIENCE

- Graduate Student Researcher - The University of California - Los Angeles (July 2017 - September 2018)

- Post-Baccalaureate Fellow - The National Institutes of Health (September 2015 - May 2017)

## Publications

---

### PUBLICATIONS

- **Characterizing variability in passive myocardial stiffness in healthy human left ventricles using personalized MRI and finite element modeling.** *Scientific reports*  
Kolawole, F. O., Wang, V. Y., Freytag, B., Loecher, M., Cork, T. E., Nash, M. P., Kuhl, E., Ennis, D. B.  
2025; 15 (1): 5556
- **An axis-specific mitral annuloplasty ring eliminates mitral regurgitation allowing mitral annular motion in an ovine model.** *Communications medicine*  
Zhu, Y., Imbrie-Moore, A. M., Park, M. H., Cork, T. E., Yajima, S., Wilkerson, R. J., Tran, N. A., Marin-Cuartas, M., Mullis, D. M., Baker, S. W., Tada, Y., Ueyama, T., Leipzig, et al  
2025; 5 (1): 40
- **Phase stabilization with motion compensated diffusion weighted imaging.** *Magnetic resonance in medicine*  
Hannum, A. J., Cork, T. E., Setsompop, K., Ennis, D. B.  
2024
- **A deep learning approach for fast muscle water T2 mapping with subject specific fat T2 calibration from multi-spin-echo acquisitions.** *Scientific reports*
