

Sahar Harati

Postdoctoral Research Fellow, Psychiatry

 Resume available Online

Bio

BIO

Sahar Harati, Ph.D., graduated with a PhD in Biomedical Informatics from Emory University. She received her Master's degree in Computer Science from the same university and her Bachelor's degree in Software Engineering from Sharif University of Technology in Iran. Her research interests are broadly Machine Learning and Data Mining with applications to Mental Health and Biomedical Informatics. For her thesis, she utilized advanced signal processing and machine learning techniques to study longitudinal data collected from patients recovering from Major Depressive Disorder when treated by Deep Brain Stimulation. Her research goal is to improve human mental well-being by developing computational techniques to find objective biomarkers of depression. She joined PanLab to work on interdisciplinary projects to develop predictive models of depression from physiological and behavioral measures.
