

Linnea Shieh

Head Librarian, Terman Engineering Library, Engineering Library

Bio

BIO

As Head of the Terman Engineering Library, I oversee the library staff, physical spaces, and programs that support research and teaching in the School of Engineering. I work with faculty and staff across the SoE to ensure that the Library maintains up-to-date collections and innovates new services to support many aspects of scholarly work, from academic communications to data deposits to technical skill development. I provide additional support and oversight for collections across the sciences and engineering. Additionally I manage library data programs which help to improve the quality of service that the library provides. I provide reference support for all fields of Engineering, and serve as instructor for workshops on data analysis and information literacy.

I am also the subject specialist for the Linguistics department, providing reference support and managing the linguistics materials collection in Green Library.

CURRENT ROLE AT STANFORD

Head Librarian, Terman Engineering Library

Curator for Linguistics
