#### BIO

Dr. Minyin Li is currently a postdoctoral fellow at Stanford University School of Medicine. His main research interests are genetic and cellular mechanisms underlying psychiatric disorders including autism and schizophrenia. By using iPSC cell derived brain organoid technology, he anticipates novel approaches to interrogate autism and neurodevelopmental diseases with human disease models.

#### PROFESSIONAL EDUCATION

- PhD, Institute of Neuroscience, Chinese Academy of Sciences , Neuroscience (2017)

#### STANFORD ADVISORS

- Sergiu Pasca, Postdoctoral Faculty Sponsor
