Stanford

Bianca Santos

- Ph.D. Student in Environment and Resources, admitted Autumn 2019
- Other Tech - Graduate, Department of Earth System Science

Bio

BIO

Bianca Santos is a PhD candidate in the Emmett Interdisciplinary Program in Environment and Resources, where she studies science and policy as it relates to the spatial management of migratory marine species and resources. Her current work focuses geographically within the Pacific Ocean, where she investigates case studies across scales, from local to international levels. Utilizing both natural and social science tools, her research applies interdisciplinary methods from the fields of marine science, ocean governance and policy, and environmental decision-making. In addition to her research, Bianca is passionate about science communication and outreach.

Prior to Stanford, Bianca served as an International Activities Analyst as a 2018 National Sea Grant Knauss Marine Policy Fellow in NOAA Research's Office of International Activities. She also worked with the Food and Agriculture Organization of the United Nations to support issues related to spatial marine management.

EDUCATION AND CERTIFICATIONS

- M.S., Virginia Institute of Marine Science, College of William and Mary , Marine Science, concentrations in Fisheries Science and Marine Policy (2017)
- B.S., Stony Brook University , Marine Vertebrate Biology, minor in Ecosystems and Human Impacts (2014)
