Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

Ruth Appel combines insights and methods from psychology, political science and computer science to develop and evaluate evidence-based personalized interventions to promote the social good. She is particularly passionate about preventing the spread of misinformation, encouraging political participation, promoting wellbeing and mental health, and addressing ethical challenges related to new technologies. Her current research projects include the 2020 Facebook Election Research Project and an online game to combat vaccine misinformation. She has also written about the ethics and privacy implications of new technologies.
