BIO

I am a postdoctoral research fellow at Stanford University, working with Prof. Lei Xing. Before that, I obtained my Ph.D. degree in the Department of Computer Science and Engineering, The Chinese University of Hong Kong, supervised by Prof. Pheng-Ann Heng and Prof. Chi-Wing Fu in July 2019. Previously, I received the B. Eng degree from the Department of Computer Science and Technology at Zhejiang University in 2015, under the supervision of Prof. Deng Cai.

My research lies at the intersection of medical image analysis and artificial intelligence. I am dedicated to designing data-efficient learning methods for biomedical image analysis. I also have expertise in deep learning for 3D vision.
