

## Merve Cerit

Ph.D. Student in Education, admitted Autumn 2020

### Bio

---

#### BIO

My research aims to understand digital behaviors and their relationship with well-being through computational models and in-situ behavior change interventions. For my research, I have been working on a large-scale smartphone dataset, Screenome. I work closely with Nick Haber and Roy Pea from the School of Education and Nilam Ram and Byron Reeves from the Communication Department.

In my work, I mostly use machine learning and human-centered design principles.

#### HONORS AND AWARDS

- Fulbright Scholar, Fulbright Commission (2019)

#### EDUCATION AND CERTIFICATIONS

- MS, Stanford University , Learning, Design and Technology (LDT) (2020)

#### LINKS

- My LinkedIn: <https://www.linkedin.com/in/mmervecerit/>

### Research & Scholarship

---

#### RESEARCH INTERESTS

- Brain and Learning Sciences
- Data Sciences
- Social and Emotional Learning
- Technology and Education

#### CURRENT RESEARCH AND SCHOLARLY INTERESTS
