Steven Chan, MD MBA

Clinical Assistant Professor (Affiliated) [Vapahcs], Psychiatry and Behavioral Sciences

Bio

BIO

Steven Chan (@StevenChanMD, StevenChanMD.com), is a clinical informaticist and addiction physician at Palo Alto VA Health, affiliated with Stanford University School of Medicine. Dr. Chan is co-investigator on clinical research — at UC Davis, funded by the U.S. Department of Health & Human Services; and at UCSF, funded by the Stanford-UCSF Center for Excellence in Regulatory Sciences — in areas of telehealth and digital health. Dr. Chan is a sought-after national speaker whose ideas, thoughts, and research have been featured at Fortune 50 companies such as Google; publications such as JAMA, Telemedicine and e-Health, JMIR (Journal of Medical Internet Research), U.S. News & World Report, and Wired; and on media outlets including the Washington Post, Wired, PBS and NPR Ideastream. Dr. Chan served as Vice Chair for the Workgroup on Mental Health & Psychiatric Apps at the American Psychiatric Association (APA), and serves on the Committees on Innovation, Telepsychiatry, and Mental Health Information Technology.

Dr. Chan additionally serves as Founder & CEO of MentalPowerHacks.com, media education for life hacks for performance, productivity & success.

Dr. Chan draws from his extensive medical, business, and informatics training at California's leading institutes — UC Berkeley, UC Irvine, UC Davis, as well as UCLA, UC San Francisco and Stanford University
