

Jamie S. Dent MCL, MHA

Grant Strategist, Emergency Medicine

Bio

BIO

I have over 20 year of grant management experience. I have managed small locally funded grants and large state and federal grants. My interests are in developing efficient systems and sustainable processes that ease the cognitive burden of leaders and researchers so that they can focus on their interests and strengths. In addition to developing sustainable administrative processes through consistent iterative adjustments, my academic interest is in leadership and volunteer administration.

CURRENT ROLE AT STANFORD

To provide support to research faculty by building out the research infrastructure. These supports include: manuscript resources, proposal development tools, data science experts, clinical research workflows.
