Bio

BIO

I am a practicing emergency physician and an clinical investigator with expertise in designing and testing digital behavioral interventions, collecting and interpreting wearable sensor data, and identifying unique mechanisms of behavior change. My primary programmatic research focus is advancing the effectiveness and reach of brief interventions with a focus on conversational agents to improve alcohol and substance use counseling. I currently serve as the PI on an NIH-funded study (1R01AA033027) Advancing Scalable Alcohol Brief Interventions in the ED: A Trial of Conversational AI with Digital Reinforcements (MICA-ED) as well as PI on an NIH-funded study (1R01AA030986) to test the efficacy of a text message intervention, ASPIRE, designed to address cognitive and behavioral elements and modify exposure to peers that influence drinking behaviors. I also collaborate with multi-disciplinary teams and mentor on research topics related to emergency medicine broadly with a focus on improving post-discharge outcomes, reducing geriatric falls, and improving advanced care planning.

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

Active Projects

1. ASPIRE: An assessor-blind, parallel design randomized controlled efficacy trial in a geographically diverse cohort of help-seeking non-collegiate young adults recruited online with hazardous drinking comparing two SMS interventions: ASPIRE (n=150) vs. CBI (n=150). (NCT06617702).

2. MICA: A pragmatic, three-arm RCT. A total of 750 adult ED patients with risky alcohol use will be randomized 1:2:2 to: (a) Standard care (brief alcohol screening + NIAAA brochure), (b) MICA ED session + 3-month booster, or (c) MICA + SMS: ED session + 12 weeks of SMS+ 3-month booster. The primary outcome is mean drinks per week at 6 months. (NCT07661563).

CLINICAL TRIALS

- Accountability Support Through Peer-Inspired Relationships and Engagement (ASPIRE) Trial, Recruiting
- Advancing Scalable Alcohol Brief Interventions in the ED: A Trial of Conversational AI With Digital Reinforcements, Not Specified
