## Mikaela Provost

Postdoctoral Research Fellow, Hopkins Marine Station

### Bio

---

#### BIO

My research uses theoretical and empirical approaches to address applied problems in fisheries management and marine conservation. My projects span multiple species and places. Currently, I study abalone in Baja California, Mexico and the effects of climate-change refugia on abalone population dynamics with Dr. Giulio De Leo and Dr. Fiorenza Micheli at Hopkins Marine Station. For more details about what I do check out my website: <https://mmprovost.wordpress.com>

#### PROFESSIONAL EDUCATION

- Doctor of Philosophy, University of California Davis (2020)
- License, Seton Hall University (2009)
- Bachelor of Science, St Norbert College , Biology (2007)
- PhD, University of California, Davis , Ecology (2020)
- MS, Rutgers University , Oceanography (2013)

#### STANFORD ADVISORS

- Giulio De Leo, Postdoctoral Faculty Sponsor
