Stanford

Edward Korot

Adjunct Clinical Instructor, Ophthalmology

Bio

BIO

I'm a vitreoretinal surgeon guided by the goal of maximally scaling improvements in patients' lives through technology.

My work involves medical AI validation, guideline development, safety, quantifying model uncertainty, AI-driven pharmaceutical trial recruitment, partner management, and UX research.

Currently, I'm an adjunct faculty at Stanford, and practicing in Michigan. When not working, you can find me doing yoga, practicing drone photography and playing tennis.
