Stanford

Fang Liu

Assistant Professor of Chemistry

Bio

BIO

Fang Liu is an assistant professor of chemistry at Stanford University. Her reserach is focused on the light induced dynamics of solid low dimensional materials and construction of low dimensional artificial structures. Prior to her current position, she was a DOE Office of Energy Efficiency and Renewable Energy (EERE) postdoctoral fellow in the group of Prof. Xiaoyang Zhu at Columbia University. Her postdoctoral research focused on using femtosecond extreme UV in probing time and angle resolved photoemission spectroscopy of 2D materials. Prior to working in Columbia, she worked under the direction of Prof. Marsha I Lester at University of Pennsylvania. She received her Ph.D. in 2015 and worked as a postdoc in the same group in 2016. At UPenn, she used time resolved spectroscopic techniques to study spectroscopy and photochemistry of Criegee intermediates. She received her B.S. in chemistry at Peking University in 2010.

ACADEMIC APPOINTMENTS

- Assistant Professor, Chemistry
- Principal Investigator, Stanford PULSE Institute

HONORS AND AWARDS

- Office of Energy Efficiency & Renewable Energy (EERE) Postdoctoral Research Award, Solar Energy Technologies Office of the Department of Energy (2018-2020)
- Miller Prize, International Symposium on Molecular Spectroscopy (2019)

PROFESSIONAL EDUCATION

- B.S. in chemistry, Peking University (2010)
- Ph.D. in chemistry, University of Pennsylvania (2015)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

The group will develop scalable and controllable processes to produce low dimensional materials and their artificial structures, and unravel their novel static and dynamical properties of broad interest to future photonic, electronic and energy technologies. The topics will include: a) Unraveling time-resolved dynamics in light-induced electronic response of two dimensional (2D) materials artificial structures. b) Fabrication of 1D atomically thin nanoribbon arrays and characterization of the electronic and magnetic properties for the prominent edge states. c) Lightwave manipulation with 2D superlattices. These research projects will provide participating students with broad interdisciplinary training across physics, chemistry, and materials science.

Teaching

COURSES

2024-25

- Advanced Physical Chemistry: CHEM 271 (Aut)
- Instrumental Analysis Principles and Practice: CHEM 131 (Spr)
- Physical Chemistry II: CHEM 173 (Aut)

2023-24

- Advanced Physical Chemistry: CHEM 271 (Aut)
- Instrumental Analysis Principles and Practice: CHEM 131 (Spr)
- Physical Chemistry II: CHEM 173 (Aut)

2022-23

- Instrumental Analysis Principles and Practice: CHEM 131 (Spr)

2021-22

- Exploring Chemical Research at Stanford: CHEM 91 (Win)
- Instrumental Analysis Principles and Practice: CHEM 131 (Spr)
- Physical Chemistry II: CHEM 173 (Aut)

STANFORD ADVISEES

Doctoral Dissertation Reader (AC)

Jenny Hu, Joseph Kelly, Joseph Lucero, Amy McKeown-Green, Pournima Narayanan, Junkun Pan, Chenyi Xia, Xiangyu Xing, Fenghao Xu

Postdoctoral Faculty Sponsor

Qile Li

Doctoral Dissertation Advisor (AC)

Amalya Johnson, Samuel Lai, Ashley Saunders, Gregory Zaborski
