#### BIO

I have a B.S. in Biology, M.Sc. in Immunology and Infectious diseases, Ph.D. in Microbiology. I am currently a Postdoctoral Researcher at the Stanford University School of Medicine, working with Dr. Jason Andrews at the new Stanford Pandemic Preparedness Hub, a fellowship I was awarded at the end of 2022. As part of a pandemic preparedness, We are trying to understand the potential viruses at risk of pandemic spread. Using disease modeling, epidemiological, and phylogenetic analysis, we study the genomic evolution and transmission dynamics of H5N1 avian influenza A after 2020.

I am in my third postdoctoral year at Stanford and completed the first two years with Dr. Desiree LaBeaud. I have a Ph.D. in Microbiology, with an emphasis in Virology, and a Master's in Infectious Diseases. My Ph.D. was conducted in Brazil, under the supervision of Dr. Betânia Drumond, and contemplated the virological and epidemiological aspects of yellow fever (YF) outbreak in Minas Gerais/BR in 2017-2018, combining laboratory, clinical, and data analysis (publications: DOI 10.1126/science.aat7115; DOI 10.1371/journal.pntd.0006538; DOI 10.1128/jcm.00254-22; DOI 10.3390/vaccines7040206; DOI 10.1186/s12985-019-1277-7). I came to Stanford University for my first postdoc with Dr. Desiree LaBeaud. For two years, I led an international NIH R01 project investigating the dynamics of the biggest YF outbreak in Brazil, including the description of a new syndrome, Late-relapsing hepatitis after yellow fever (DOI 10.3390/v12020222), and risk factors for severe YF. I was also involved in other projects regarding SARS-CoV-2 variants and disease severity in infants (DOI 10.3389/fmed.2022.896352), Rift Valley fever virus epidemiology in humans and animals in Kenya (DOI 10.1371/journal.pgph.0000505), and dengue virus evolution in Africa (ongoing Ph.D. candidate mentorship).

During the COVID-19 pandemic, we also supported the Brazilian Ministry of Health with the SARS-CoV-2 diagnosis in human samples and also in the investigation of the SARS-CoV-2 RNA in surfaces of density public areas of Belo Horizonte. Since Nov/2018 I had been an editor in the journal Docência do Ensino Superior (RDES / GIZ / UFMG) and in Jan/2020 I became Editor-in-Chief.

#### HONORS AND AWARDS

- Highlighted poster, 7th Pan-American Dengue Research Network Meeting (2020)
- Oral presentation, IV FAMERP-UTMB: Emerging infections in the Americas (2019)
- Travel Grant: 16th International Course on Dengue, Zika, and other Emergent Arboviruses., Institute of Tropical Medicine Pedro Kourí. La Havana, Cuba. Scholarship: OPAS (2019)
- Travel grant for oral abstract presentation, 6th Pan-American Dengue Research Network Meeting (2018)
- Travel Grant for arboviruses course participation, São Paulo School of Advanced Science (2017)
- Travel grant: Molecular Epidemiology in Infectious Diseases of Global Significance, ICOPHAI and Centre for Genetic Engineering and Biotechnology (ICGEB) (2013)

#### BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS

- Editor-in-Chief, Revista Docência do Ensino Superior (UFMG - Brazil) <https://periodicos.ufmg.br/index.php/rdes> (2020 - 2020)

- Member, American Society of Tropical Medicine and Hygiene (2020 - present)
- Member, Brazilian Society of Virology (2012 - present)

## STANFORD ADVISORS

- Jason Andrews, Postdoctoral Faculty Sponsor

## Research & Scholarship

---

### LAB AFFILIATIONS

- Jason Andrews, Andrews' lab (11/1/2022)
- Desiree LaBeaud, LaBeaud Lab (8/1/2020 - - 10/31/2022)

## Publications

---
