

Shadi Elaridi

Masters Student in Mechanical Engineering, admitted Autumn 2020

Bio

BIO

I'm Shadi Elaridi, a Senior Undergraduate student studying Mechanical Engineering at Stanford University. My concentration is in Product Realization and among my many passions, I aspire to engineer affordable products that bring the world together in solving problems. Having lived overseas for nine years, I have gained firsthand experience of global inequities. I aim to use affordable, efficient engineering as a means of combatting these inequities.

My research interests fall within designing for extreme environments and using mechanical engineering design to bridging global resource gaps. Please, feel free to reach out with any questions you may have!
