

Stanford

Haaris Kadri

Casual - Non-Exempt, Surgery - Multi-Organ Transplantation

Bio

BIO

I'm an undergraduate student at UC Berkeley studying molecular and cellular biology, with an emphasis on immunology and pathogenesis. I'm interested in learning about novel advancements in clinical therapeutics, as well as integrative biotechnology. I hope to pursue an MD or MD/PhD and find ways to incorporate pathology research into my medical practice. At UC Berkeley, I'm involved on campus as a tutor for lower-division general and organic chemistry, as well as a mentor for the UC Berkeley Bioengineering High School Competition (BioEHSC).

I'm also really interested in math and enjoy taking math-centric courses that pique my interest.

CURRENT ROLE AT STANFORD

Research Assistant (Melcher Lab): July 2020 - Present

EDUCATION AND CERTIFICATIONS

- BA, University of California - Berkeley , Molecular and Cellular Biology (Emphasis in Immunology and Pathogenesis) (2023)
