

Stanford

Dhruv Suri

Masters Student in Energy Resources Engineering, admitted Autumn 2021

Bio

BIO

Dhruv Suri, from Delhi, India is pursuing a master's degree in energy resources engineering at Stanford School of Earth, Energy and Environmental Sciences. He graduated from the Manipal Institute of Technology in India with a bachelor's degree in aeronautical engineering. Dhruv aspires to work at the nexus of energy and climate, and help vulnerable communities overcome access barriers in India and other developing countries. He has worked as a visiting student researcher at the MIT D-Lab, and as a research assistant in Serbia, Singapore and the Netherlands. Dhruv is the co-founder of Candela Energy, a last-mile distribution organization providing rural villages access to life-improving products and has been awarded by ETH Student Project House in Switzerland and EarthTech in Australia.
