

Stanford

Stepfan Huntsman

Masters Student in Geological Sciences

Bio

BIO

I've had an interest in rocks and fossils since I was a small child, amassing a large collection in my youth, but hadn't considered it a viable career path instead starting my path as a social scientist studying gender and sexuality. My interest in a career in paleontology peaked after finishing my first degree, leading me to pursue a second bachelors degree. While working on my undergraduate at Weber State I discovered a true deep love of plants as well as a curiosity about the methods they use to adapt to new environments, which has lead me to pursuing a Masters degree here at Stanford University.

HONORS AND AWARDS

- Outstanding Graduate Award, Weber State Univeristy - Department of Earth and Environmental Sciences (2020)

EDUCATION AND CERTIFICATIONS

- Bachelor of Science, Weber State University , Geology (2020)
- Area Studies Certificate, Utah State University , Women and Gender Studies (2013)
- Bachelor of Science, Utah State University , Sociology (2013)

Publications

PRESENTATIONS

- Reconstructing Paleobotanical Alpine Environments of the Variscan Mountains of Southern France - Office of Undergraduate Research Symposium 2020
