Bio

BIO

After graduating from Vanderbilt Medical School, Dr. Fishman completed the Psychiatry Residency Program at University of Pittsburgh Medical Center, where he served as Chief Resident and was lauded with the program's sole Teaching Award. Thereafter, Dr. Fishman completed the Consultation-Liaison Psychiatry Fellowship also at the University of Pittsburgh Medical Center. During his training, he also served as Chief Fellow was elected into Alpha Omega Alpha, Honors Medical Society. In the subsequent years, Dr. Fishman practiced as a consultation and liaison psychiatrist, simultaneously serving both academic and community hospitals in the Greater Pittsburgh Area. In his outpatient clinic, he managed and treated patients with complex issues linking the domains of neurology and psychiatry, and specialized in nonepileptic episodes.

Dr. Fishman joined the faculty of Stanford University School of Medicine in 2020 as a Clinical Assistant Professor of Psychiatry and Behavioral Sciences. Since his appointment, Dr. Fishman has led medical psychiatry services on the medical/surgical units, intensive care units and in the emergency department at Stanford Hospital to provide psychiatric care for patients with acute diagnoses and provide graduate medical education to psychiatry, internal medicine, palliative care, oncology, and neurology trainees. His work on developing a framework for evidence-based best practice guidelines was recognized with a 2020 DLIN/Fischer finalist award.

Dr. Fishman is the appointed Chief of the Inpatient Proactive Psycho-Oncology Service, a service designed to proactively identify patients with psychopathology or who will require psychiatric intervention during their hospitalization. The service helps prevent development and escalation of psychopathology in the inpatient blood and marrow transplant and other cancer populations. His outpatient work is primarily as a psychiatric oncologist at the Stanford Cancer Center where he provides psychiatric consultation services and collaborates closely with his oncology colleagues to deliver comprehensive cancer care.

His clinical and scholarly interests include the interface of medicine and psychiatry, psycho-oncology, catatonia, neuropsychiatry, collaborative care models, psychotherapy for the medically ill, interdisciplinary and graduate medical education.
