

Srivardhamanan Appavoo

Graduate, Vice Provost and Dean of Research

Bio

BIO

I completed my studies at the Stanford AI program in 2023 and am presently serving as a founding NLP engineer at dashworks.ai. My primary research endeavors center around enhancing NLP model architectures, particularly neural retrievers. I have engaged in collaborative research with esteemed Stanford PhD students such as Ashwin Paranjape and Omar Khattab.

Enthusiastic about forging new research partnerships :)
